Please follow these instructions carefully to determine the correct size for different product styles.

Measurements should always be taken in the following order, and as soon after waking as possible when swelling is minimal.

CALF STYLE

Open/Closed Toe

1	Measure the ankle circumference at the narrowest part of the ankle, above the ankle bone. Use the appropriate series sizing chart to determine if ankle is SMALL, MEDIUM, LARGE or X-LARGE. Note: This should be your first measurement.
2	Measure the calf circumference at the fullest part of the calf.
3	Determine the calf length by measuring from the floor up to the fibular head. This measurement is taken on the outside of the leg.

PANTYHOSE AND THIGH-HIGH STYLE

Open/Closed Toe

1	Measure the ankle circumference directly above the ankle bone. Use the appropriate series sizing chart to determine if ankle is SMALL, MEDIUM, LARGE, or X-LARGE. Note: This should be your first measurement.
2	Measure the calf circumference at the fullest part of the calf.
3	Skip Step 3 (but refer to General Guidelines #6 below).
4	Measure the thigh at its widest circumference.
5	Determine the leg length by measuring from the floor up to the gluteal fold.
6	Determine the hip circumference by measuring the widest part of the hips.

GENERAL GUIDELINES

1	Measurements should always be taken as soon after waking as possible, when swelling is minimal.
2	Measure against bare skin, not over clothing.
3	The measuring system is based on having the foot flat against the floor and the calf or leg at a right angle to the foot (see images to the right for examples).
4	Measurements should be taken by pulling the tape around the leg so that it is snug but not constricting.
5	Length measurements should be taken from the ground up.
6	Take all measurements, even if the patient only requires calf-length products, as the patient might decide at a later date to purchase additional styles.

1. Ankle circumference directly above ankle bone

2. Calf circumference at fullest part of the calf

3. Calf length from the floor to the fibular head

4. Widest circumference of the thigh

5. Leg length from the floor up to the gluteal fold

6. Circumference at the hip

Established in 1864, SIGVARIS GROUP is, and has always been, a family-owned company. Founded and headquartered in Switzerland, our passion for helping people feel their best is why we've been a global market leader for 155 years and counting.

Our products restore, assist and enhance people's lives through brands like:

sigvaris

Medical Compression Socks, Hosiery
and Solutions for Medically Complex Edema

SIGVARIS WELL BEING

Consumer Healthcare: Simplified Sizing

Life changes. Your lifestyle doesn't have to.

At Sigvaris, we care about people. For 155 years, our compression products have offered effective and reliable solutions for venous conditions – anywhere, anytime, and for anyone.

As a Sigvaris Certified Fitter, when you provide **the Sigvaris solution** to your clients, you're helping them move with life, without compromise. Because you care about people too. And that's why we're proud to work with Fitters like you.

Our shared passion for helping people is what got us here, and we're excited to take our next step towards wellness together.

Let's take a look at what we've got in store.

Be yourself.

ESSENTIAL

Support Yourself

Sigvaris Essential solutions always meet your customers' needs. These straightforward stockings are an everyday go-to for people who seek the comfort, support and reliability of traditional therapeutic socks and stockings.

Why choose **Essential**?

- Reduce swelling and discomfort.
- Long-distance travel.
- Everyday comfort and reliability.

STYLE

Express Yourself

Choice is empowering, and fashion can be as unique as you are. With Sigvaris Style, personality will shine as your customers select from distinctive hosiery and socks.

Why choose **Style**?

- Fashionable, modern patterns and designs.
- Special occasion and formal wear.
- Our most luxurious feel.

MOTION

Push Yourself

When daily comfort for hard-working legs is required, put your customers in motion. Sigvaris Motion socks offer **all day strong** support for people with active lives.

Why choose **Motion**?

- Cushioned sole for added comfort.
- Durable thermoregulating wool.
- Moisture-wicking yarns.

Motion COMFORT

for women & men

Motion Comfort offers cushioned soles and moisture wicking to keep your legs feeling energized all day long.

Compression Level

20–30mmHg

Features and Benefits

**Cushioned
Sole**

Durable

**Moisture
Wicking**

- NILIT® Aquarius fibers provide moisture wicking to keep feet dry and comfortable
- Cushioned soles to absorb impact and help prevent blisters
- Smooth, flat toe seam

Fiber Content

- 86% Nylon, 14% Spandex
- Non-latex

Best Suited for

- Management of symptoms related to chronic venous disease
- Healthcare professionals
- Uniforms requiring black or solid color
- Individuals working in physically-demanding occupations

NATURAL RUBBER

for women & men

Natural Rubber offers patients a durable, long-term containment solution for compression therapy with minimal fiber fatigue throughout the day.

Compression Level

30–40mmHg

40–50mmHg

50–60mmHg

Features and Benefits

Natural Rubber

Durable

Wide Size Range

- Ideal for patients with more serious indications
- Extended sizing for a custom-like fit

Fiber Content

- 70% Nylon, 30% Natural Latex Rubber (Calf & Thigh-high styles)
- 75% Nylon, 20% Natural Latex Rubber, 5% other fibers (Pantyhose style)
- **Caution:** contains natural rubber latex that may cause allergic reaction

Best Suited for

- Severe varicosities
- Chronic edema post DVT
- Severe venous stasis
- Prevention of ulcer recurrence
- Early stages of lymphedema
- Active venous ulcers

Medically Complex Edema

MEDICALLY COMPLEX EDEMA

The SIGVARIS GROUP line of products for medically complex edema (MCE) are for the treatment and management of conditions impacting the lymphatic and venous circulatory systems.

The product portfolio contains ready-to-wear garments for the active treatment and maintenance of lymphedema and for patients managing chronic venous diseases in the upper and lower extremities.

A sampling of these products is included in the following pages.

For more details and to request a complete MCE catalog, please ask your local SIGVARIS GROUP Territory Manager or email sigvariscares@sigvaris.com.

Compreflex Transition **CALF**

20-50mmHg

When to Use

- Medicare approved for ulcers under code **A6545-AW**
- Patient requires a compressive liner; the Transition Liner provides 10-15mmHg in the foot and ankle
- Mild foot compression in liner is desired
- Ability to wear standard footwear over liner is desired

Conditions

- Lymphedema
- Edema
- Chronic venous disease (CVD)
- Chronic venous insufficiency (CVI) including, but not limited to: ulcer due to venous stasis
- Lipedema

Transition Liner

10-15 mmHg of mild compression in the foot and ankle.
(see page 87 for details)

Coolflex™ Standard CALF

20–40mmHg

When to Use

- Varying ranges of adjustable resting compression is desired (20-40mmHg)
- No compression in the liner is desired
- Simplified one-handed donning is desired
- More breathable fabric is desired
- Desire to select separate foot piece

Conditions

- Lymphedema
- Edema
- Chronic venous disease (CVD)
- Chronic venous insufficiency (CVI) including, but not limited to: ulcer due to venous stasis
- Lipedema

One-Handed Donning

Spacer Fabric TR is designed to be highly breathable for cool-wearing comfort

Durable, metal hook closures for maximum strength and durability

Basic Liner

Non-Compressive
(see page 87 for details)

Compreboot Lite

Variable compression

Features

- Ultra-thin profile that easily fits into most footwear
- Highly adjustable design (may be trimmed to fit)
- Ideal for mild edema/lymphedema
- Breathable stretch fabric conforms to ankle
- Provides mild, therapeutic compression
- Available in Black only

Compreboot Standard

Variable compression

Features

- 4-way stretch for firm compression around ankle
- Included with Compreflex Standard Calf & Foot
- Ideal for mild-moderate edema/lymphedema
- Features neoprene material with hook and loop tabs
- Open heel and toe
- Provides moderate, therapeutic compression
- Available in Beige and Black

Compreboot Plus

Variable compression

Features

- Chipped foam lining
- Ideal for chronic/acute edema/lymphedema
- Removable gripper patches provide traction
- Straps are removable for custom positioning or replacement
- Provides moderate, therapeutic compression
- Available in Black only

SYMPTOMS & INDICATIONS

Symptoms / Indications	Compression Level at the Ankle
<ul style="list-style-type: none"> Tired, achy legs Occupational or evening edema Leg discomfort from long hours of standing or sitting Prevent varicosities & swelling during pregnancy Preventative for legs predisposed to risk Reduce swelling during travel Prevent DVT during travel 	15–20mmHg
<ul style="list-style-type: none"> Diabetics who experience edema (see Cautions below) 	18–25mmHg
<ul style="list-style-type: none"> Heavy, fatigued, aching legs Mild edema in lower extremities Mild varicosities with minimal edema Mild varicosities during pregnancy Lymphedema upper extremities Post-procedure of small veins Prevention or management of DVT 	20–30mmHg
<ul style="list-style-type: none"> Moderate varicosities with mild to moderate edema (also during pregnancy) Post-procedure of larger veins to maintain treatment success CEAP C3 (edema), C4 (skin changes without ulceration), C5 (skin changes with healed ulceration), C6 (skin changes with active ulcerations) Management and treatment of DVT or Post-Thrombotic Syndrome Superficial phlebitis Lymphedema after decongestant therapy to maintain reduction Orthostatic / postural hypotension Post-fracture, post-traumatic edema <p><i>Note: A prescription is recommended for stockings with the indications of 30mmHg or higher</i></p>	30–40mmHg
<ul style="list-style-type: none"> Lymphedema after decongestant therapy to maintain reduction Severe Post-Thrombotic Syndrome Severe varicosities and/or edema 	40mmHg or higher
<ul style="list-style-type: none"> Severe arterial insufficiency, intermittent claudication, ischemia Uncontrolled congestive heart failure 	Contraindications
<ul style="list-style-type: none"> Skin sensitivities or allergies Advanced neuropathy with sensory loss in leg or foot Diabetes with arterial compromise Confinement to bed or non-ambulatory use unless otherwise prescribed by the physician Eczema, hypodermatitis, dermatosclerosis, dermatitis 	Cautions
<p>The therapeutic effect of graduated compression stockings is based on the compression level. With the proper CEAP classification, the correct compression level at the ankle can be chosen. For more severe symptoms, consult with a vascular specialist.</p>	
<p><i>No liability accepted for non-observance of contraindications and cautions.</i> Fronek HS, Bergan JJ, et al. The Fundamentals of Phlebology: Venous Disease for Clinicians. 2004. pg 151. Blaettner, et al. Leg Symptoms of Healthy People and Their Treatment with Compression Hosiery. Phlebology 2008. Compression therapy of the extremities. Partsch, Rabe, Stemmer. ISBN: 2.85480.770.7.</p>	

Term	Definition	Sigvaris Usage
CHRONIC VENOUS DISEASE (CVD)	A disease state comprised of disorders ranging from tired, achy legs, varicose veins, skin issues to venous leg ulcers (open and healed).	SIGVARIS GROUP manufactures MEDICAL and CONSUMER HEALTH products to help reduce the risk of, improve symptoms of, and provide treatment for CVD.
DOUBLE-COVERED YARN	Spandex fibers are covered twice with yarn to prevent bare spandex from touching the skin for improved wearing comfort.	Used in nearly all SIGVARIS GROUP graduated compression socks and hosiery to create products that are easy to put on and take off, while also providing greater comfort.
DEEP VEIN THROMBOSIS (DVT)	A blood clot in a deep vein, most commonly in the lower leg or thigh.	SIGVARIS GROUP cares about DVT prevention. Clinical evidence supports the use of graduated compression to help prevent DVTs and the more serious complication of PE (Pulmonary Embolism), which can be life-threatening.
GRADUATED COMPRESSION VS. ANTI-EMBOLISM	Graduated compression is for ambulatory patients, whereas anti-embolism stockings are for non-mobile patients.	SIGVARIS GROUP offers true graduated compression, meaning products are tightest at the ankle and decrease in pressure going up the leg to help improve circulation.
HYPOALLERGENIC	Designed to minimize the chance of an allergic reaction.	SIGVARIS GROUP offers non-latex products and cotton fabrics for those with sensitive skin and allergies. Also, many SIGVARIS GROUP accessories are designed for consumers with sensitive skin.
ISO CERTIFIED	SIGVARIS GROUP is ISO (International Organization for Standardization) certified, indicating we have a quality system in place that meets the requirements to manufacture Class II medical devices.	SIGVARIS GROUP follows ISO Standard 13485:2003 for our products manufactured in North and South America.
MICROFIBER	An extremely fine synthetic fiber knitted into textiles with the texture and drape of natural-fiber fabric. This fabric has excellent breathability.	Used to create products with a soft and comfortable feel. Find this fiber in 840 Soft Opaque, 830, 143 & 183 Microfiber Patterns, 820 Microfiber, and 189 BUSINESS CASUAL.
mmHg (MILLIMETERS OF MERCURY)	Defined as the extra pressure generated by a column of mercury one millimeter high; the same measurement used for blood pressure.	SIGVARIS GROUP products are offered in several ranges of compression levels based on this measurement.
MERINO WOOL	Merino is the softest and finest wool available in the world and is inherently itch-free.	SIGVARIS GROUP uses this premium wool yarn to create soft products that are thermoregulating for use in all seasons. Used in 422 Thermoregulating Wool, 421 MERINO OUTDOOR PERFORMANCE SOCKS, 240 Merino Wool, and 152 & 192 ALL-SEASON MERINO WOOL.
SEA ISLAND COTTON	Sea Island Cotton is the rarest cotton in the world and represents the finest in cotton softness.	SIGVARIS GROUP uses the highest-quality yarns in the industry to create products that are best in class. Look for this fine quality cotton in our 220 Sea Island and 151 & 191 SEA ISLAND COTTON SOCKS.
SENSINNOV	A patented SIGVARIS silicone top band that gently grips the skin and keeps the band in place all day.	This top band is featured in 780 Sheer, 840 Soft Opaque, 710 Patterns, and 820 Microfiber to help keep thigh-high stockings in place all day long.
Supima COTTON SUPIMA® WORLD'S FINEST COTTONS	Supima accounts for only about three percent of annual cotton production in the United States. Its fineness and longer staple length make it a premium cotton fiber.	SIGVARIS GROUP uses this premium cotton yarn in the 230 Cotton, 220 Sea Island and 151 & 191 SEA ISLAND COTTON SOCKS, 146 & 186 CASUAL COTTON, and 230, 142 & 182 Cushioned Cotton products, making them comfortable and ideal for those with sensitive skin.
